

Residential Carts Made with Re-claimed Cart Resin

“All we use are regrind carts. I can’t tell the difference between this cart and a regular cart and it saves me money.”

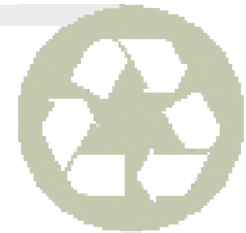

Don Lewis with Ken’s Trash

“I have used the Transformer for 4-1/2 years. Initially I did so because of the price. After finding out how good these carts are and how well they hold up, why pay more?”

Rob Scott with Coastal Waste

Get your green on by using
Otto Container Management’s Transformer™ cart.

The Transformer™ is an environmentally-friendly product because it is made almost entirely of reclaimed resin. Made from carts that Otto Container Management has recovered from the field, the Transformer™ prevents unnecessary landfilling of carts.

▼ Available Carts

Available in black and dark shades of blue, green and gray, the Transformer™ sets you apart from other haulers by providing your residents with an earth-friendly product that stands up to years of use. Recycling bins made of regrind plastic are also available. Call us to find out our current inventory.
